

# AZIZ SOULÉ

Software Engineer

## PERSONAL DETAILS

Cocody Angré Abidjan  
aziz.soule.dev@gmail.com, +225 01 51 17 93 50, +225 07 59 73 78 03  
Nationality: Ivorian  
Website: azizsoule.me  
LinkedIn: linkedin.com/in/azizsoule  
Github: github.com/azizsoule

## PROFILE

Hey! I'm a software engineer passionate by retro machines/devices and their hardware. I have experience leading and collaborating on projects from large to small size, focusing on high-quality delivery and delightful user experiences. I'm enthusiastic about ambitious projects that create real societal impact, and I'm skilled in taking ownership from concept to completion. Like most developers, I have some fun side projects I work on. Lately, I took the challenge to build a retro gaming console emulator, and I also got interest in 2D/3D animation industry.

## TECHNICAL SKILLS

**Frontend:** Flutter, HTML, CSS, JS  
**Backend:** Spring Boot, NestJS  
**Programming:** Dart, Java, Typescript  
**Database:** PostgreSQL, MySQL, Redis  
**Infrastructure:** AWS, Terraform  
**DevOps:** Docker, Codemagic, Github actions, Circle CI

## SOFT SKILLS

Autonomy	Communication
Adaptability	Empathy
Team Collaboration	End user focus

## LANGUAGES

French (Fluent)	English (Medium)
-----------------	------------------

## EMPLOYMENT

<b>Growth Software Engineer</b> Djamo, Abidjan, Côte d'Ivoire As a Fullstack Developer on the Growth team at Djamo, I handle the technical aspects of team initiatives for	Mar 2024 - Present
--	--------------------

the Djamo mobile app. I build end-to-end growth experiences, from infrastructure to frontend, aimed at increasing user engagement with company's products.

Stack: NestJS, Flutter, Firebase, PostgreSQL, Redis, AWS Cloud, Terraform

## Software Engineer

Feb 2022 - Mar 2024

Djamo, Abidjan, Côte d'Ivoire

I've been responsible for building and maintaining a leading financial app, widely used by millions of users across Côte d'Ivoire and Sénégal. My contributions include:

- Designing and managing deposits and withdrawals experiences (Frontend).
- Improving mobile app performance.
- Implementing the mobile app design system.
- Setting up the CI/CD pipeline for the mobile app.
- End to end development of some features.

Stack: Stack technique: Flutter, Firebase, Maestro, NestJS, PostgreSQL, Redis, AWS Cloud, Terraform, Flask

## Mobile Software Engineer

Aug 2022 - Mar 2023

Agence GladUX (Freelance), Abidjan

Developed Akitaine, a mobile application that enables users to ship items between Côte d'Ivoire and France.

Stack: Flutter

## Fullstack Software Engineer

Nov 2021 - Jul 2022

Conso-epargne (Freelance), Abidjan

Developed the 'Conso-epargne' e-commerce app, including the mobile app backend and administration console using Spring Boot. Implemented a referral and reward system.

Stack: Spring Boot, Hibernate, Flutter, HTML, CSS, JS

## Mobile Software Engineer

Oct 2020 - May 2021

Syca SAS, Abidjan

Contributed to the development of two financial mobile applications: B.Free and Soaga MOBILE. Soaga MOBILE is the app for the West African asset management company, while B.Free is a mobile wallet backed by BNI, an Ivorian bank, offering services like bill and insurance payments, deposits/withdrawals, Visa Direct payments, and more.

Stack: Flutter

## EDUCATION

### IT methods applied to business management (MIAE in French)

Sep 2017 - Jul 2022

Université Félix Houphouet Boigny, Abidjan

A high-level, multi-disciplinary, professionally-oriented course leading to a Master's degree (BAC + 5) in computer science and management.
